

LEGACY 万承

LGT ECOSYSTEM ARCHITECTURE

Five Core Pillars · Technology Infrastructure · Institutional Partner Targets

The companies referenced in this document are potential / target technology and liquidity partners under evaluation. None represents a confirmed, signed or exclusive partnership; all integrations remain subject to commercial, technical and regulatory review.

本文档所提及的公司均为正在评估中的潜在 / 目标技术与流动性合作伙伴。以上名称均不构成已确认、签署或独家的合作关系，任何整合均须经过商业、技术及监管层面的审查。

ENGLISH

PART I

LGT Five Core Pillars

What LEGACY builds — the fixed top-level structure of the ecosystem

01 — LGT Five Core Pillars

The LGT ecosystem is organized around five fixed core pillars. These five pillars represent what LEGACY (万承) builds directly. Every technology and liquidity partner referenced later in this document exists to support these pillars as infrastructure — partners are not, and should not be read as, a sixth pillar.

Pillar	Scope
1. COMMUNITY	Telegram-native community, wallet and identity layer connecting members to the ecosystem.
2. PREDICTION MARKETS	On-chain prediction markets for community-driven forecasting and engagement.
3. LEGACY CHAIN	The ecosystem's settlement and execution layer, positioned to become LGT's native chain.
4. AI	AI-driven insight, automation and assistant capabilities across the ecosystem.
5. RWA	Real-world asset registry, verification, custody and on-chain representation.

Pillars vs. Partners

Five pillars = what LEGACY builds. Partners = infrastructure supporting those pillars. This distinction is maintained throughout this document so that partner logos are never visually or structurally elevated to pillar status.

PART II

Technology & Infrastructure Partners

The infrastructure layer supporting the five core pillars

02 — Technology & Infrastructure Partners

The companies listed below are potential / target technology partners under evaluation. Inclusion here does not represent a confirmed, signed, or exclusive partnership. Any integration remains subject to commercial, technical and regulatory review.

	AWS Cloud Infrastructure	Elastic compute, storage and managed services underpinning platform uptime and scale.
	IPFS Decentralized Storage	Content-addressed, distributed storage for documents, media and off-chain records.
	Privy Wallet / User Onboarding	Embedded wallet infrastructure for frictionless account creation and key management.
	Chainlink Oracle / External Data	Decentralized oracle network for price feeds and verifiable off-chain data.
	OpenZeppelin Smart-Contract Security	Audited contract libraries and security tooling for on-chain code.
	Sumsu Identity Verification / KYC	Identity verification and KYC/AML workflow infrastructure for onboarding compliance.
	Fireblocks Institutional Digital-Asset Infrastructure	Institutional-grade custody, transfer and settlement infrastructure for digital assets.
	Chainalysis Blockchain Analytics / Compliance	On-chain analytics, transaction monitoring and compliance tooling.

PART III

Institutional Liquidity Targets

A potential institutional liquidity / market infrastructure layer

03 — Institutional Liquidity Targets

Separate from the technology stack, LEGACY (万承) has identified a set of institutional trading and liquidity firms representing a potential institutional liquidity / market infrastructure layer for the ecosystem. As with the technology partners above, these names represent target relationships under evaluation, not confirmed commercial agreements.

	GSR Liquidity / Market Infrastructure	Global digital-asset trading firm providing liquidity and market-making services.
	Wintermute Liquidity / Market Infrastructure	Algorithmic market maker across centralized and decentralized venues.
	FalconX Liquidity / Market Infrastructure	Institutional digital-asset prime brokerage and trading infrastructure.

PART IV

Source Architecture & Logo Reference

LGT → Five Pillars → Infrastructure → Liquidity

04 — Source Architecture & Logo Reference

The diagram below reproduces the ecosystem architecture so that investors and partners can see the relationship between LGT, the five core pillars, the technology infrastructure layer, and the institutional liquidity layer in a single view.

Figure 4.1 — LGT ecosystem architecture: core token, five pillars, infrastructure ring, liquidity layer.

All company names and logos referenced in this document — technology infrastructure and institutional liquidity alike — are potential / target integrations under evaluation, subject to commercial, technical and regulatory review. None should be read as a confirmed or exclusive partnership absent a signed agreement.

LGT 五大核心支柱

LEGACY 万承要建设的核心生态 — 固定的顶层结构

01 — LGT 五大核心支柱

LGT 生态围绕五大固定核心支柱构建。这五大支柱代表 LEGACY（万承）直接建设的内容。本文档后续提及的每一个技术与流动性合作伙伴，其存在都是为了以基础设施的形式支撑这五大支柱——合作伙伴不构成、也不应被理解为“第六大支柱”。

支柱	范围
1. 社区	原生于 Telegram 的社区、钱包与身份层，将成员与生态系统连接起来。
2. 预测市场	面向社区的链上预测市场，支持社区驱动的预测与参与。
3. Legacy Chain	生态系统的结算与执行层，定位为 LGT 未来的原生公链。
4. 人工智能	贯穿整个生态系统的 AI 驱动洞察、自动化与智能助手能力。
5. 现实世界资产	现实世界资产的登记、核验、托管与链上映射。

支柱与合作伙伴的区别

五大支柱 = LEGACY 万承要建设的核心生态；技术 / 机构合作伙伴 = 为五大支柱提供支撑的基础设施。本文档始终保持这一区分，确保合作伙伴标识在视觉与结构上都不会被提升至“支柱”的层级。

技术与基础设施合作伙伴

支撑五大核心支柱的基础设施层

02 一 技术与基础设施合作伙伴

以下所列公司为正在评估中的潜在 / 目标技术合作伙伴。列于此处并不代表已达成确定、签署或独家的合作关系。任何整合均须经过商业、技术及监管层面的审查。

	AWS 云基础设施	弹性计算、存储与托管服务，支撑平台的正常运行与规模扩展。
	IPFS 去中心化存储	面向文档、媒体及链下记录的内容寻址分布式存储。
	Privy 钱包 / 用户接入	嵌入式钱包基础设施，实现无摩擦的账户创建与密钥管理。
	Chainlink 预言机 / 外部数据	去中心化预言机网络，提供价格数据与可验证的链下数据。
	OpenZeppelin 智能合约安全	经过审计的合约库与安全工具，保障链上代码安全。
	Sumsu 身份核验 / KYC	身份核验与 KYC/AML 流程基础设施，支持合规接入。
	Fireblocks 机构级数字资产基础设施	面向数字资产的机构级托管、转账与结算基础设施。
	Chainalysis 链上分析 / 合规	链上数据分析、交易监控与合规工具。

机构流动性合作伙伴目标

潜在的机构流动性 / 市场基础设施层

03 一 机构流动性合作伙伴目标

与技术栈相独立，LEGACY（万承）已识别出一组机构交易与流动性提供商，其可构成生态系统潜在的机构流动性 / 市场基础设施层。与上述技术合作伙伴一样，这些名称代表正在评估中的目标合作关系，而非已确认的商业协议。

	GSR 流动性 / 市场基础设施	全球数字资产交易机构，提供流动性与做市服务。
	Wintermute 流动性 / 市场基础设施	覆盖中心化与去中心化交易场所的算法做市商。
	FalconX 流动性 / 市场基础设施	面向机构的数字资产主经纪与交易基础设施。

原始架构图与标识参考

LGT → 五大支柱 → 基础设施 → 流动性

04 一 原始架构图与标识参考

下图重新呈现了生态系统架构，使投资人与合作伙伴能够在同一视图中看到 LGT、五大核心支柱、技术基础设施层与机构流动性层之间的关系。

图 4.1 — LGT 生态系统架构：核心代币、五大支柱、基础设施环、流动性层。

本文档中提及的所有公司名称与标识——无论是技术基础设施还是机构流动性合作伙伴——均为正在评估中的潜在 / 目标整合对象，须经过商业、技术及监管层面的审查。在未签署正式协议前，均不应被理解为已确认或独家的合作关系。
